

12.7X99 MM NATO (.50 BMG)

Experience superior power and precision with the 12.7x99mm NATO (.50 BMG) ammunition, crafted for both M33 Ball and Tracer M17/AP8 options, featuring a robust lead core full metal jacket bullet and non-corrosive boxer primer for reliable performance. Each round, made by Windham Weaponry, utilizes high-quality brass casings and ball powder propellant, achieving a velocity of 900 m/s for exceptional impact. Available loose or linked in 100-round steel cans, this ammo is designed to deliver unwavering consistency on the range or in the field.

“Quality goes in before ammunition goes out.”
