

7.62X39 MM

Made by Windham Weaponry, the 7.62x39mm NATO M80 Ball is built for precision and consistent performance. It features a 123-grain full metal jacket lead-core bullet, non-corrosive boxer primer, and double-base propellant for reliable accuracy and smooth cycling. Manufactured in the USA, this ammunition is a trusted choice for training, defense, and duty applications where dependable quality is essential.

“Quality goes in before ammunition goes out.”
